

We are the smartest solution
for your project:
intuitive, secure, and easy to integrate.

No matter the project, we deliver the smartest solution

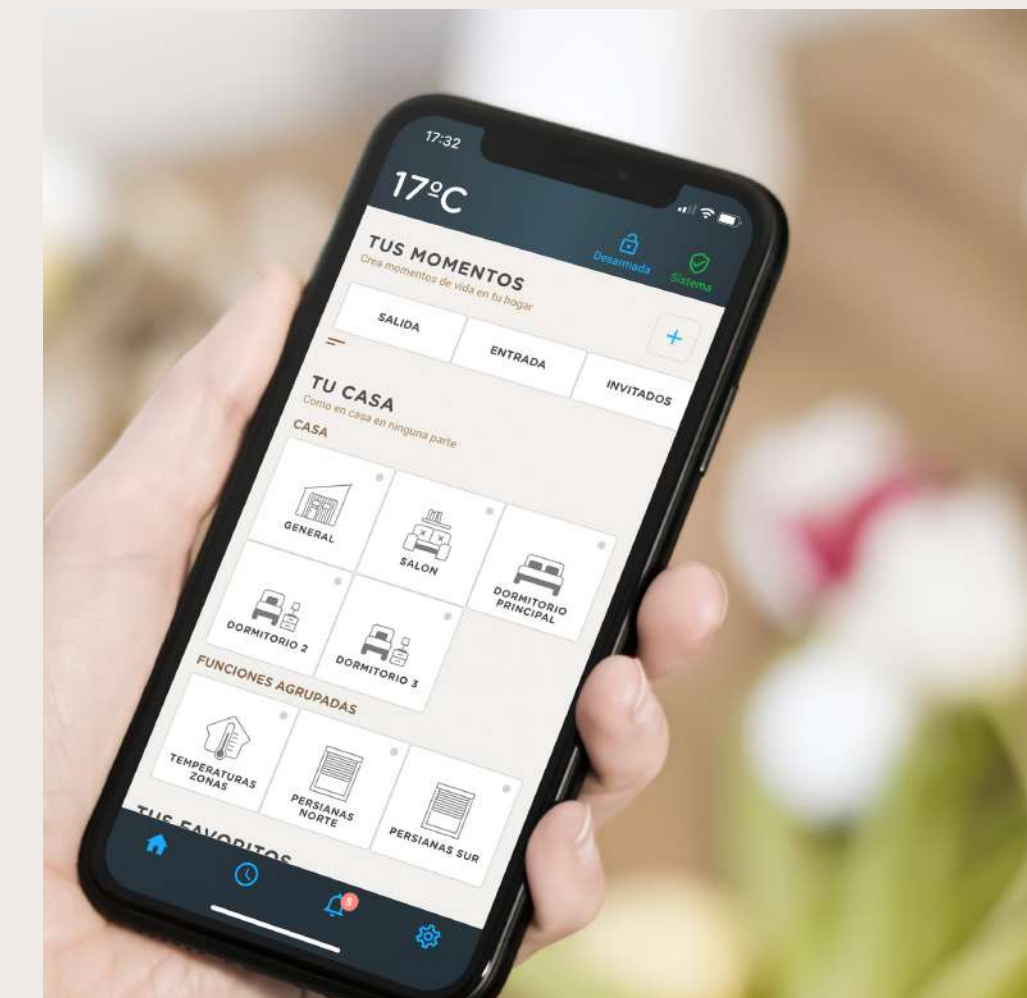

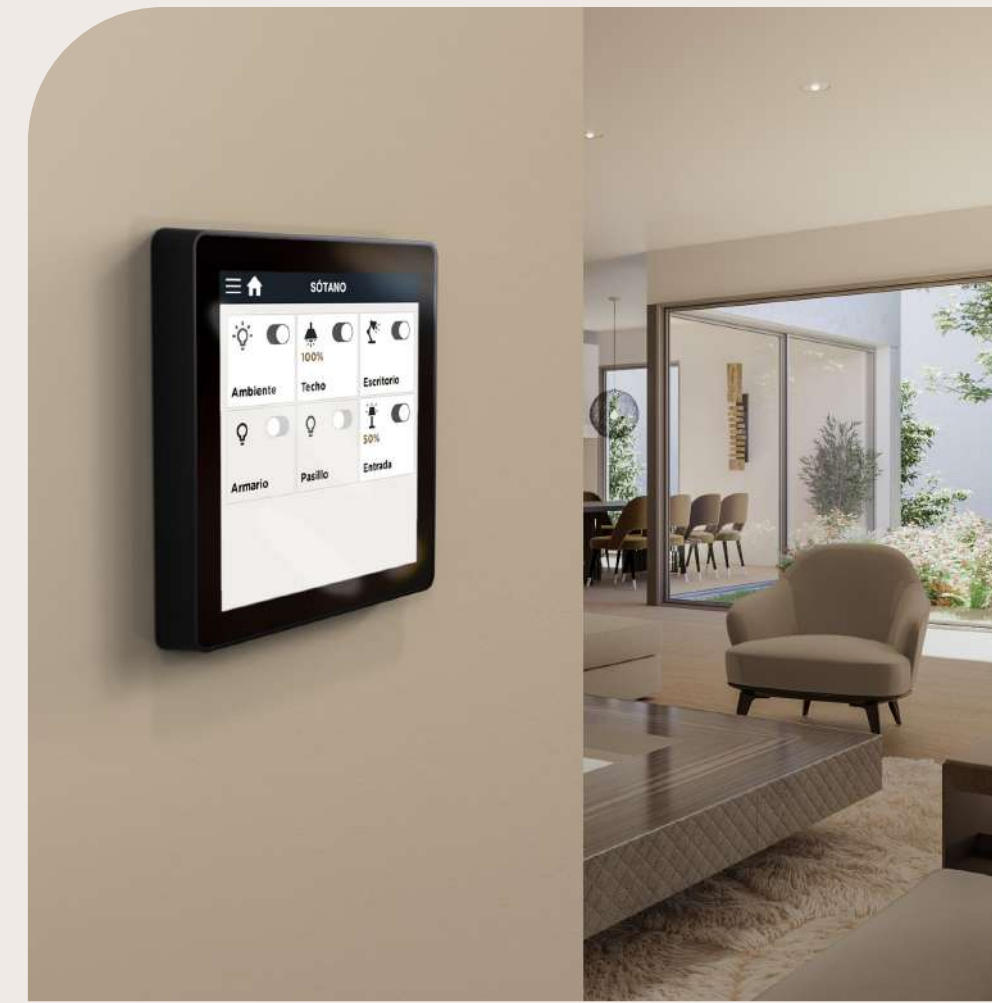

The only limit to what you can integrate is your imagination

At ONNA, we are manufacturers. This allows us to control the entire development of the solution and adapt it to the specific requirements of each project.

Our technology combines the flexibility of KNX with pioneering API integrations and an intuitive, refined, and enjoyable user experience.

So your clients can truly perceive the value behind your work.

Connections

The perfect blend of functionality and elegance

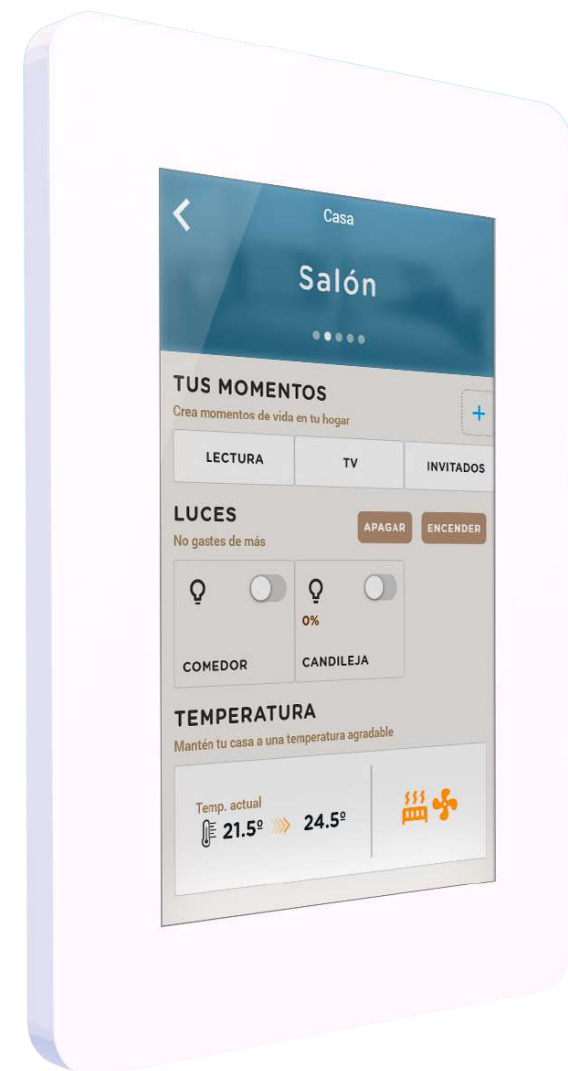

ONNA M, L & V

Interactive panels with built-in Cloud Server, available in 5" and 7" sizes. Designed for controlling and monitoring KNX installations.

They offer not only an intuitive, elegant, and visually appealing interface, but also a wide range of powerful features.

With remote access, our panels integrate seamlessly with access control, alarm, intercom, and audio systems. They are also natively compatible with Alexa.

ONNA M & MLite

- 5" interactive display.
- Onna app with vertical and horizontal scroll.
- KNX installation control.
- Thermostat function and temperature sensor.
- Full and partial alarm arming.
- Data visualization with charts.
- Advanced logic gates.
- IP camera viewing.
- Native integrations via API.

Onna M: Unlimited Rooms and Group Addresses.

Onna MLite: 24 Rooms and 300 Group Addresses.

ONNA V & VLite

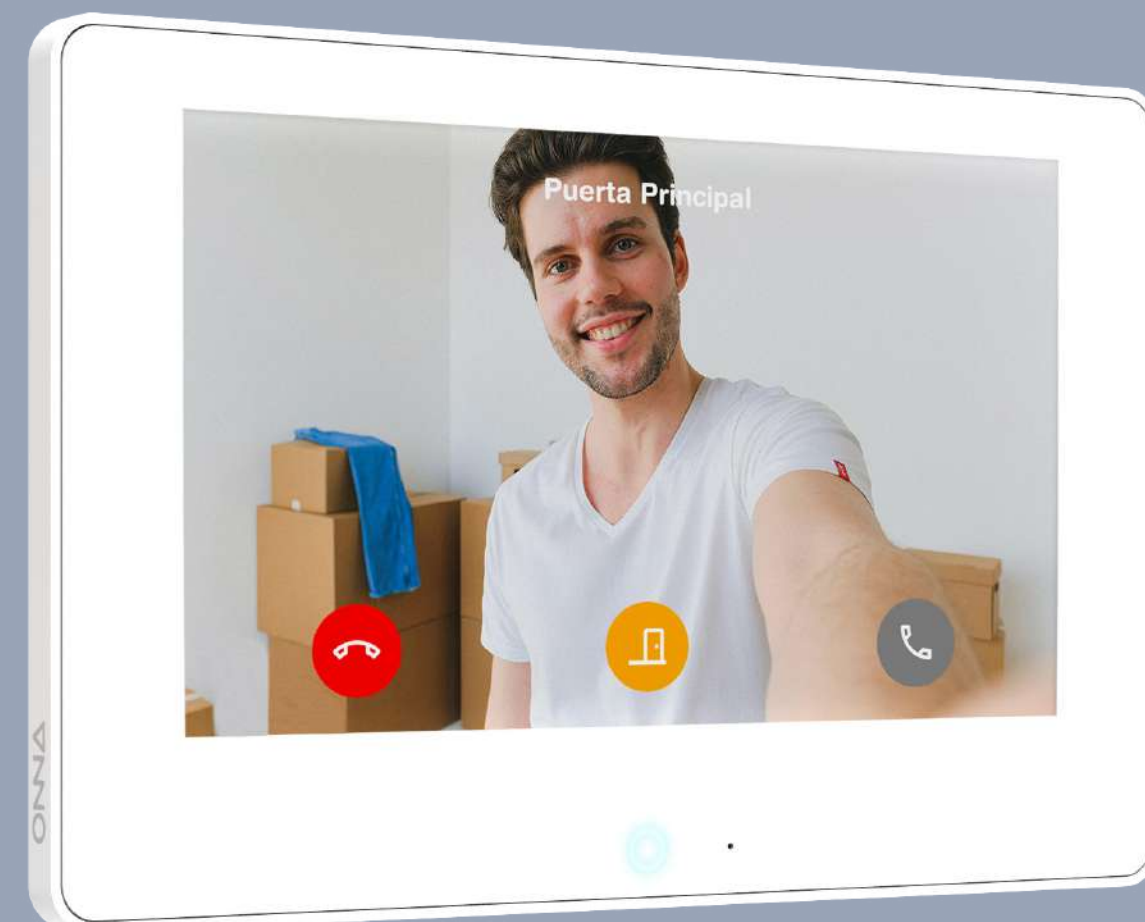

- 5" interactive display.
- Onna app with vertical and horizontal scroll.
- KNX installation control.
- Thermostat function and temperature sensor.
- Full and partial alarm arming.
- Data visualization with charts.
- Advanced logic gates.
- IP camera viewing.
- Native integrations via API.
- **Video intercom integration.**

Onna V: Unlimited Rooms and Group Addresses.

Onna VLite: 24 Rooms and 300 Group Addresses.

ONNA L

- Larger size for better visibility.
- 7" interactive display.
- Onna app with vertical and horizontal scroll.
- KNX installation control.
- Thermostat function and temperature sensor.
- Full and partial alarm arming.
- Data visualization with charts.
- Advanced logic gates.
- IP camera viewing.
- Native integrations via API.
- **Video intercom integration.**

Unlimited Rooms and Group Addresses.

Compatible with the leading SIP video intercom brands on the market:

FERMAX 2N DoorBird Akuvox

and many more...

Discover our smart solutions

Your imagination is the only limit to what you can control and monitor.

SECURITY

- Digital access and permissions
- Technical alarms
- Alerts and notifications
- Video intercom

ENERGY EFFICIENCY

- Consumption monitoring
- Climate control
- Lighting
- Shading systems

ROOM CONTROL

- Scheduling & scenes
- Blind/shutter control
- Audio & voice control

AND MUCH MORE...

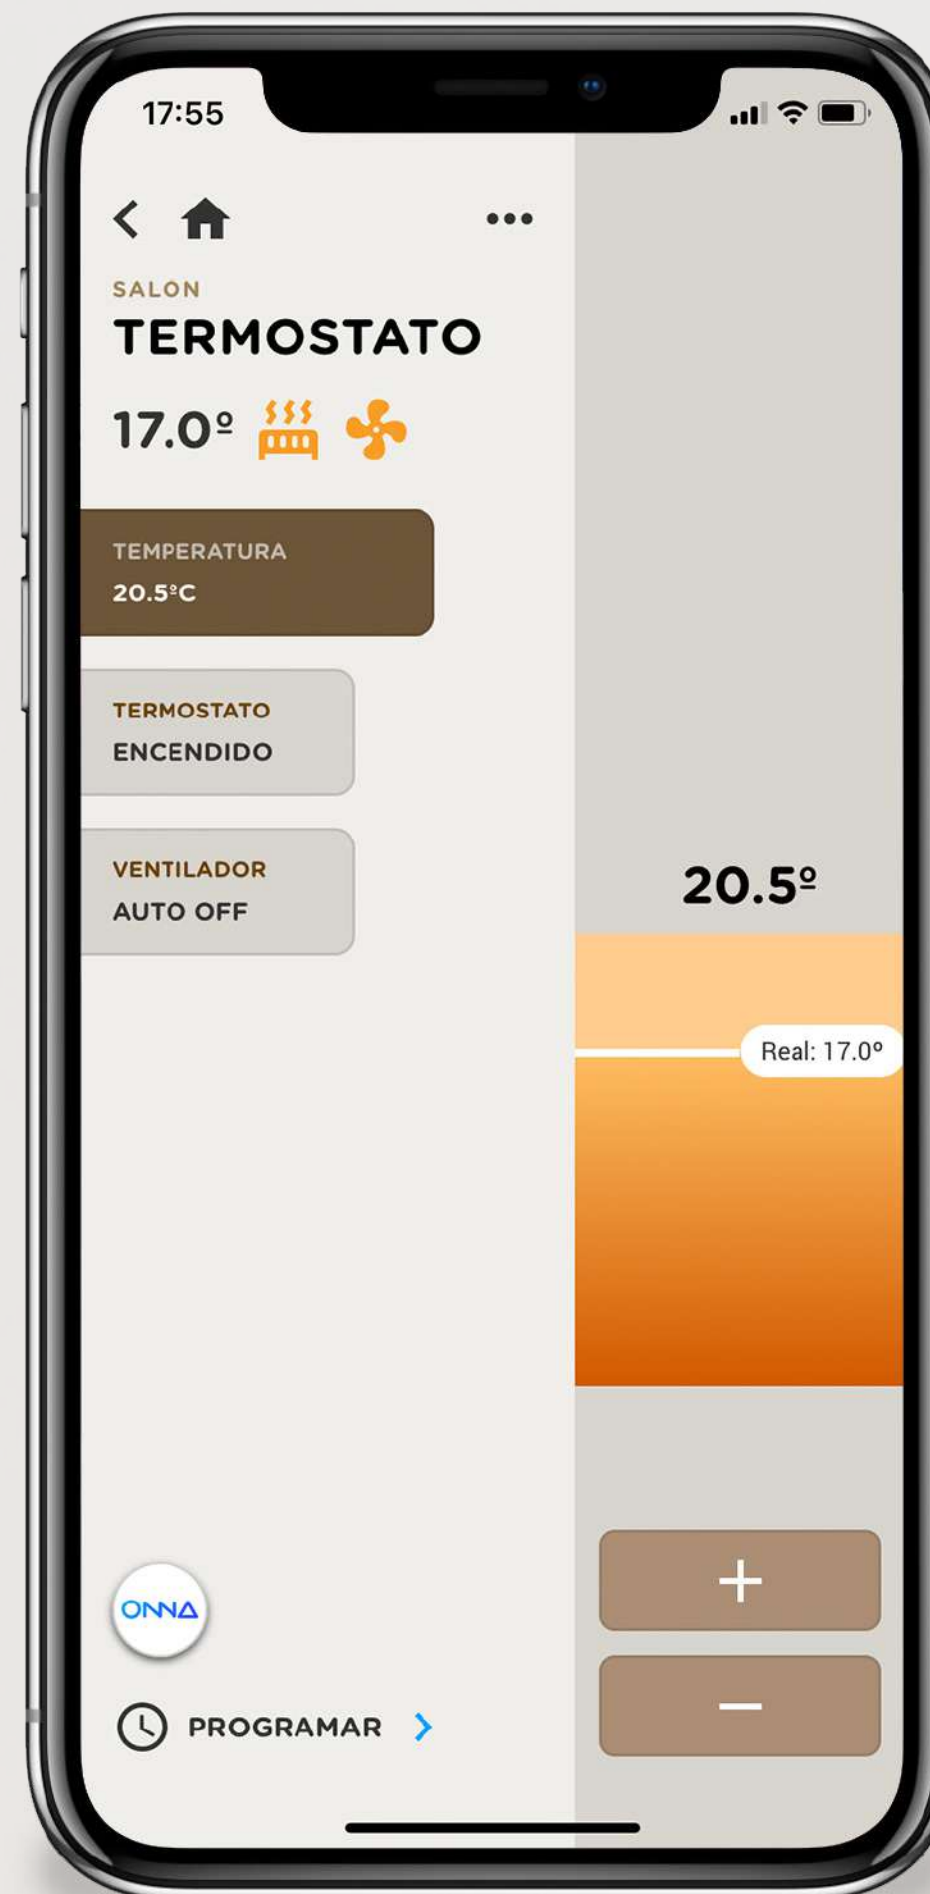

- Common area booking
- Irrigation control
- Decibel level monitoring

CLIMATE CONTROL

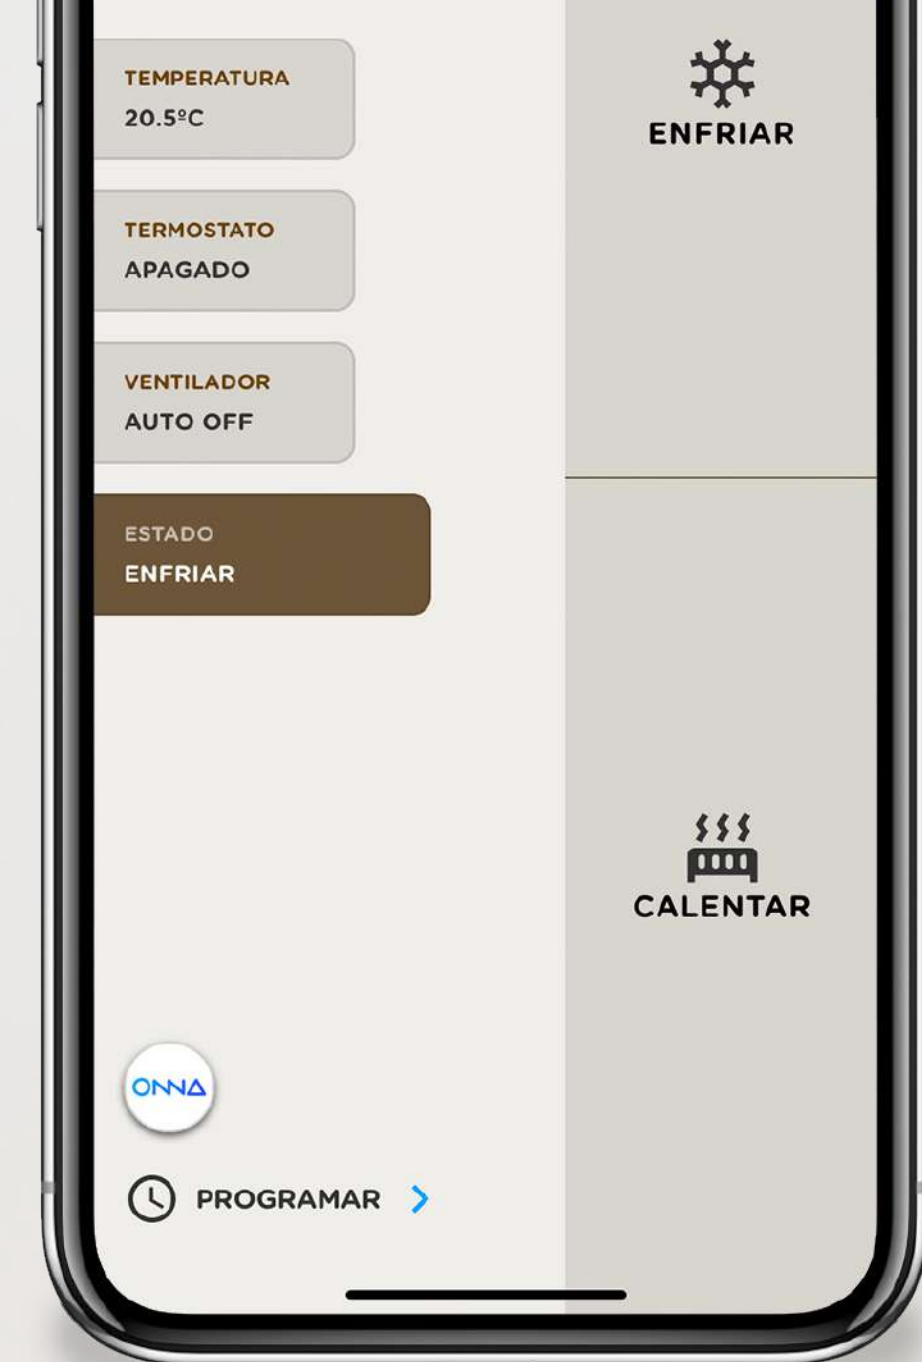

Manage your space's temperature and ventilation to improve comfort and well-being. For example, lower the temperature at night for optimal thermal comfort while everyone sleeps, or monitor air quality and ventilate to prevent carbon dioxide buildup.

Control any type of HVAC system with ease, including mixed systems such as underfloor heating and air conditioning. Our solution is flexible and offers a wide range of possibilities.

In addition, centralize all thermostats in a single interface and app. View the temperatures of each room and see which ones are active or off at a glance.

Our innovative menus make thermostat control and configuration simple. Unlike other manufacturers, you don't need to start from scratch. Just select the features you want and the interface will adapt perfectly.

SMART & FRIENDLY

LIGHTING & SHADING CONTROL

Turn lights and blinds on or off, raise or lower them, and adjust their settings remotely or automatically to create a more energy-efficient space.

Choose the most suitable RGB color or select the white color temperature from an RGBW strip to create the perfect atmosphere.

With our scroll down and sideways navigation, you can control as many lighting circuits as you need, no matter how many there are.

You can also personalize each one with an icon, keeping everything intuitive and easy to use. After all, a floor lamp isn't the same as the living room lights or a simple decorative bulb.

INTRUSION ALARM

Enjoy advanced security and greater peace of mind from a single app.

Receive real-time alerts and push notifications in the event of an intrusion.

Our innovative system can use KNX technology or integrate with AJAX-certified intrusion control panels connected to an ARC (Alarm Receiving Centre).

This integration allows you to arm and disarm the alarm, as well as view the status of each zone, all from the ONNA app with the same level of security offered by the manufacturer's own app.

AUDIO

Start your day with your favorite song or create different moods for every space.

Play music in the living room while dining with friends, an audiobook in the kids' room, or nature sounds in the garden while you relax.

All of this is possible thanks to our integration with the SONOS system. Access your favorite playlists, skip tracks, or adjust the volume.

You decide how you want your day to sound.

SONOS

CONSUMPTION MONITORING & ALERT MANAGER

Monitor your electricity, water (hot and cold), and overall energy consumption.

Receive real-time alerts to take preventive measures and maximize savings.

Track your consumption through clear and intuitive daily, monthly, or yearly charts, and keep a detailed consumption history for easy comparison.

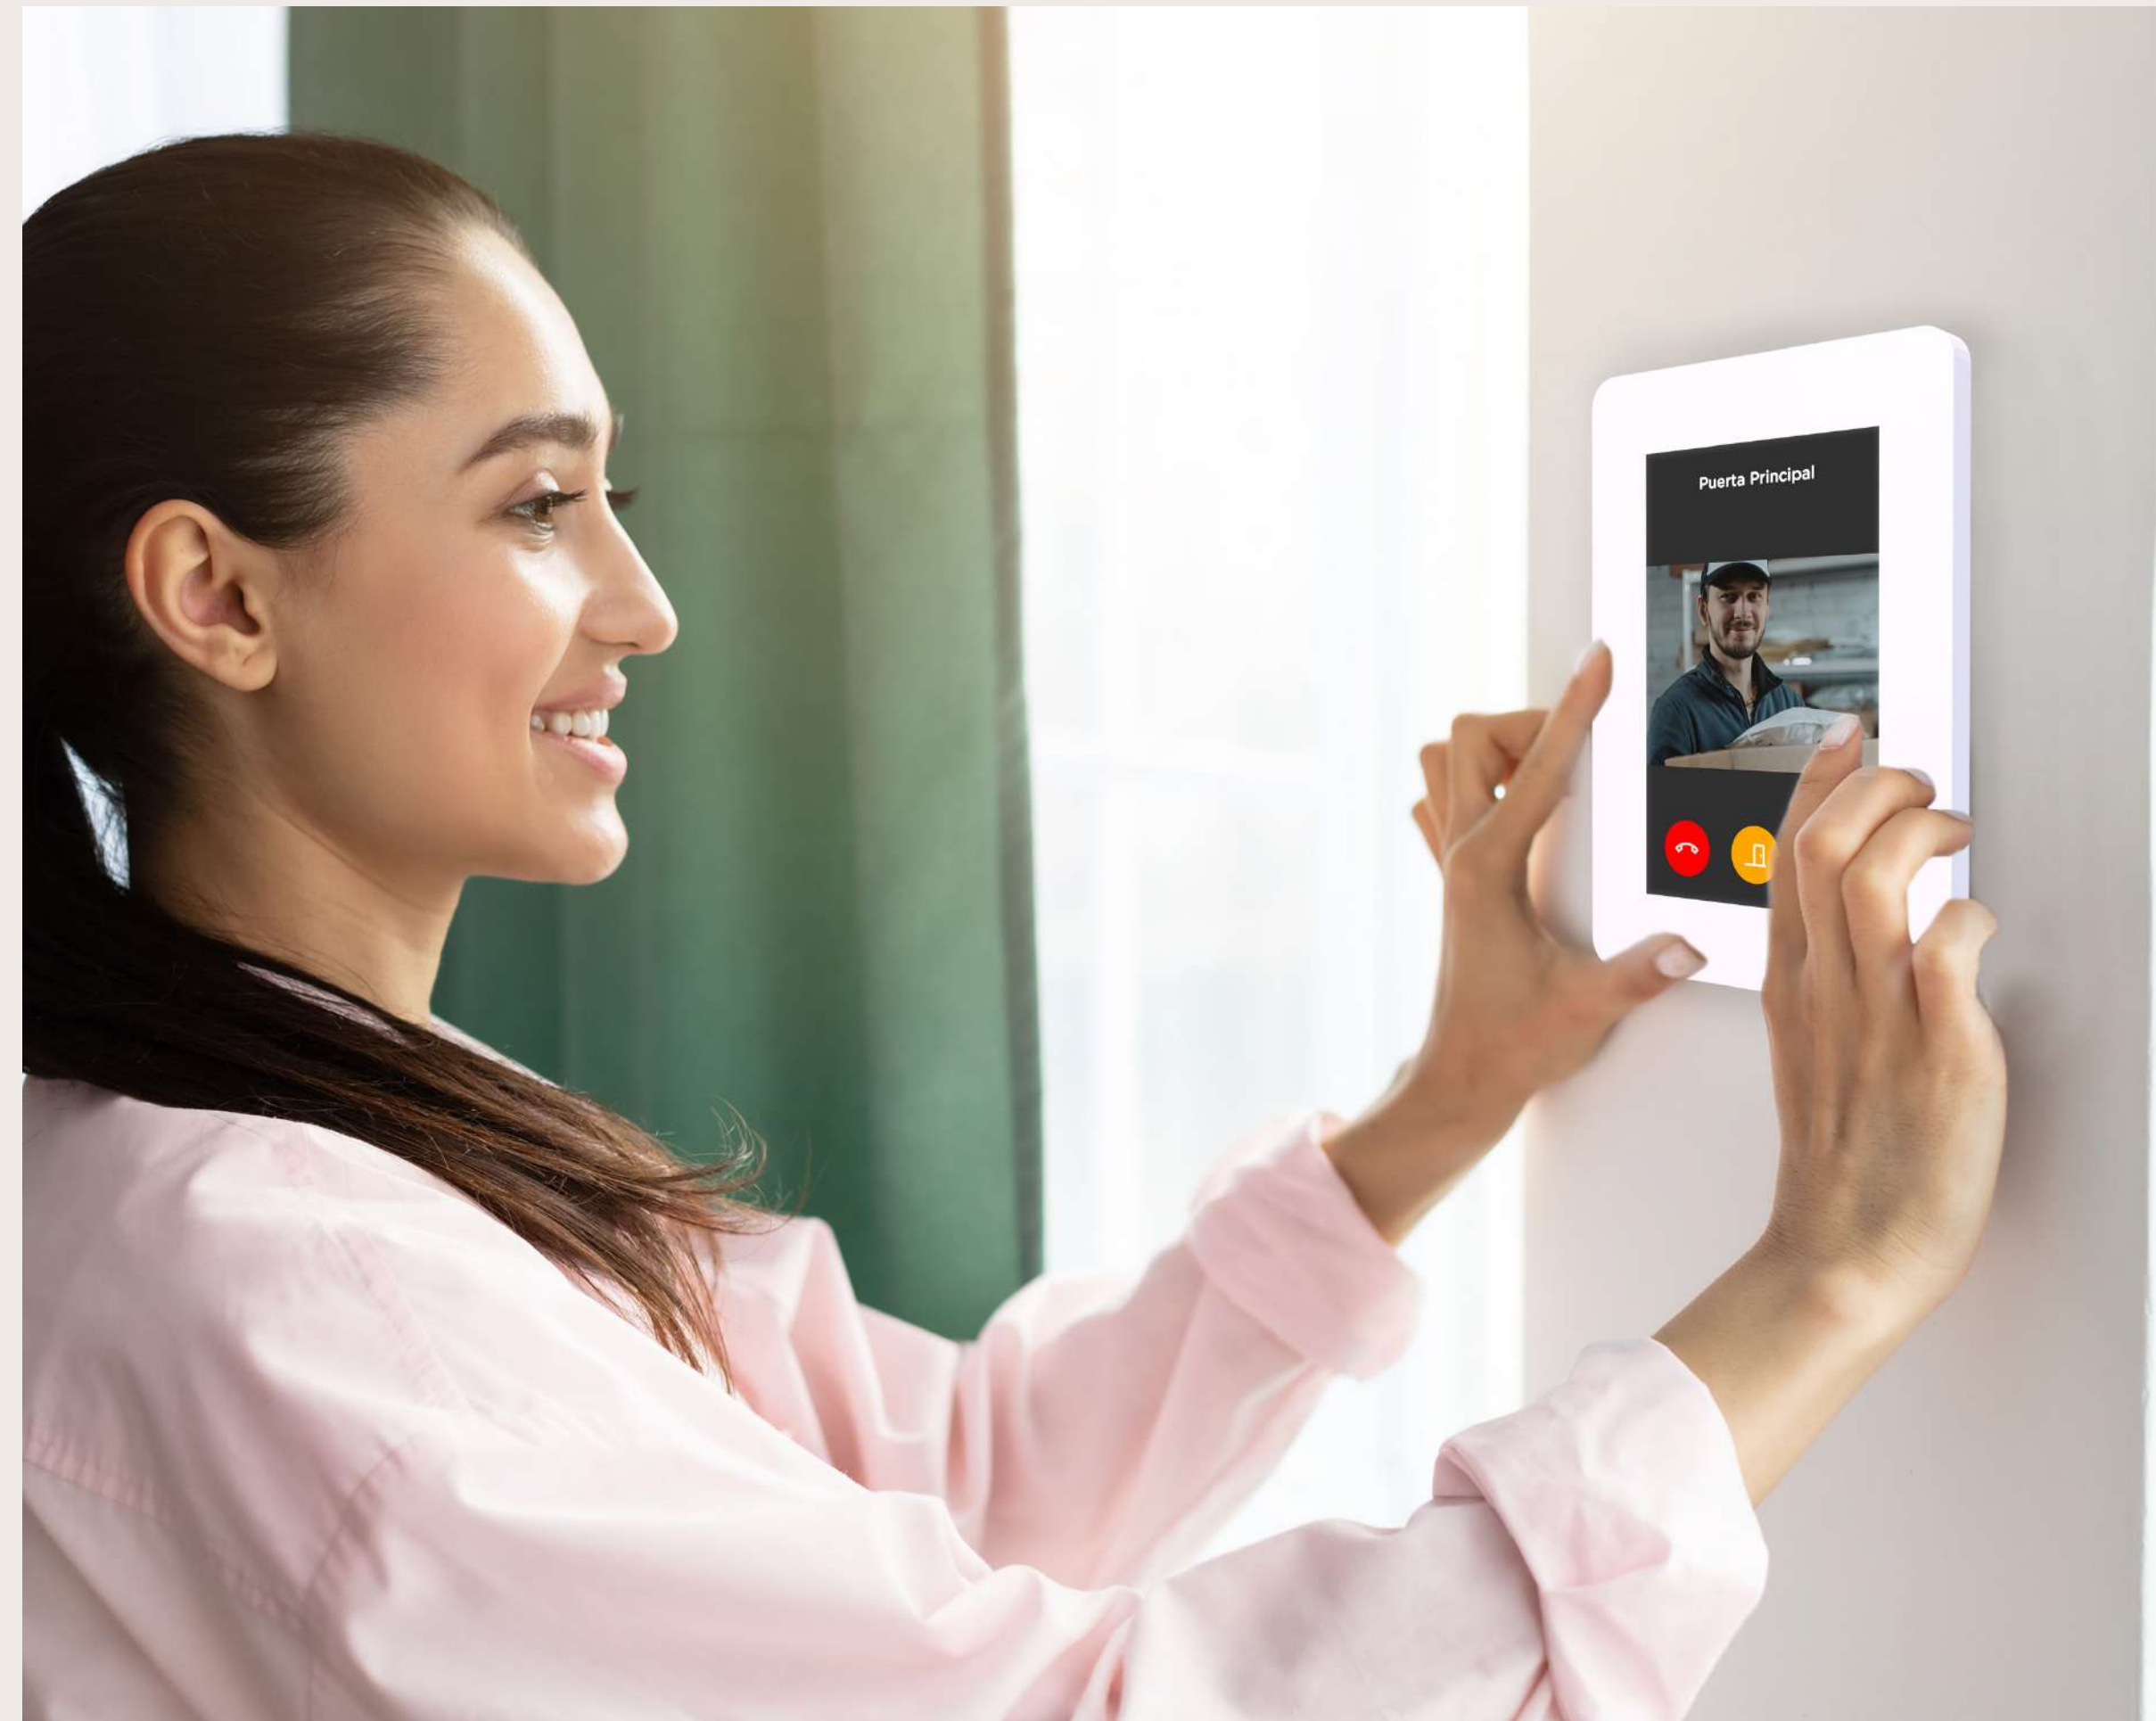

VIDEO INTERCOM

See and communicate with visitors through any SIP-based video intercom on the market.

Use the same ONNA screen to receive calls, avoiding duplicate devices and achieving a much cleaner, more elegant look.

FERMAX **2N** DoorBird **Akuvox**

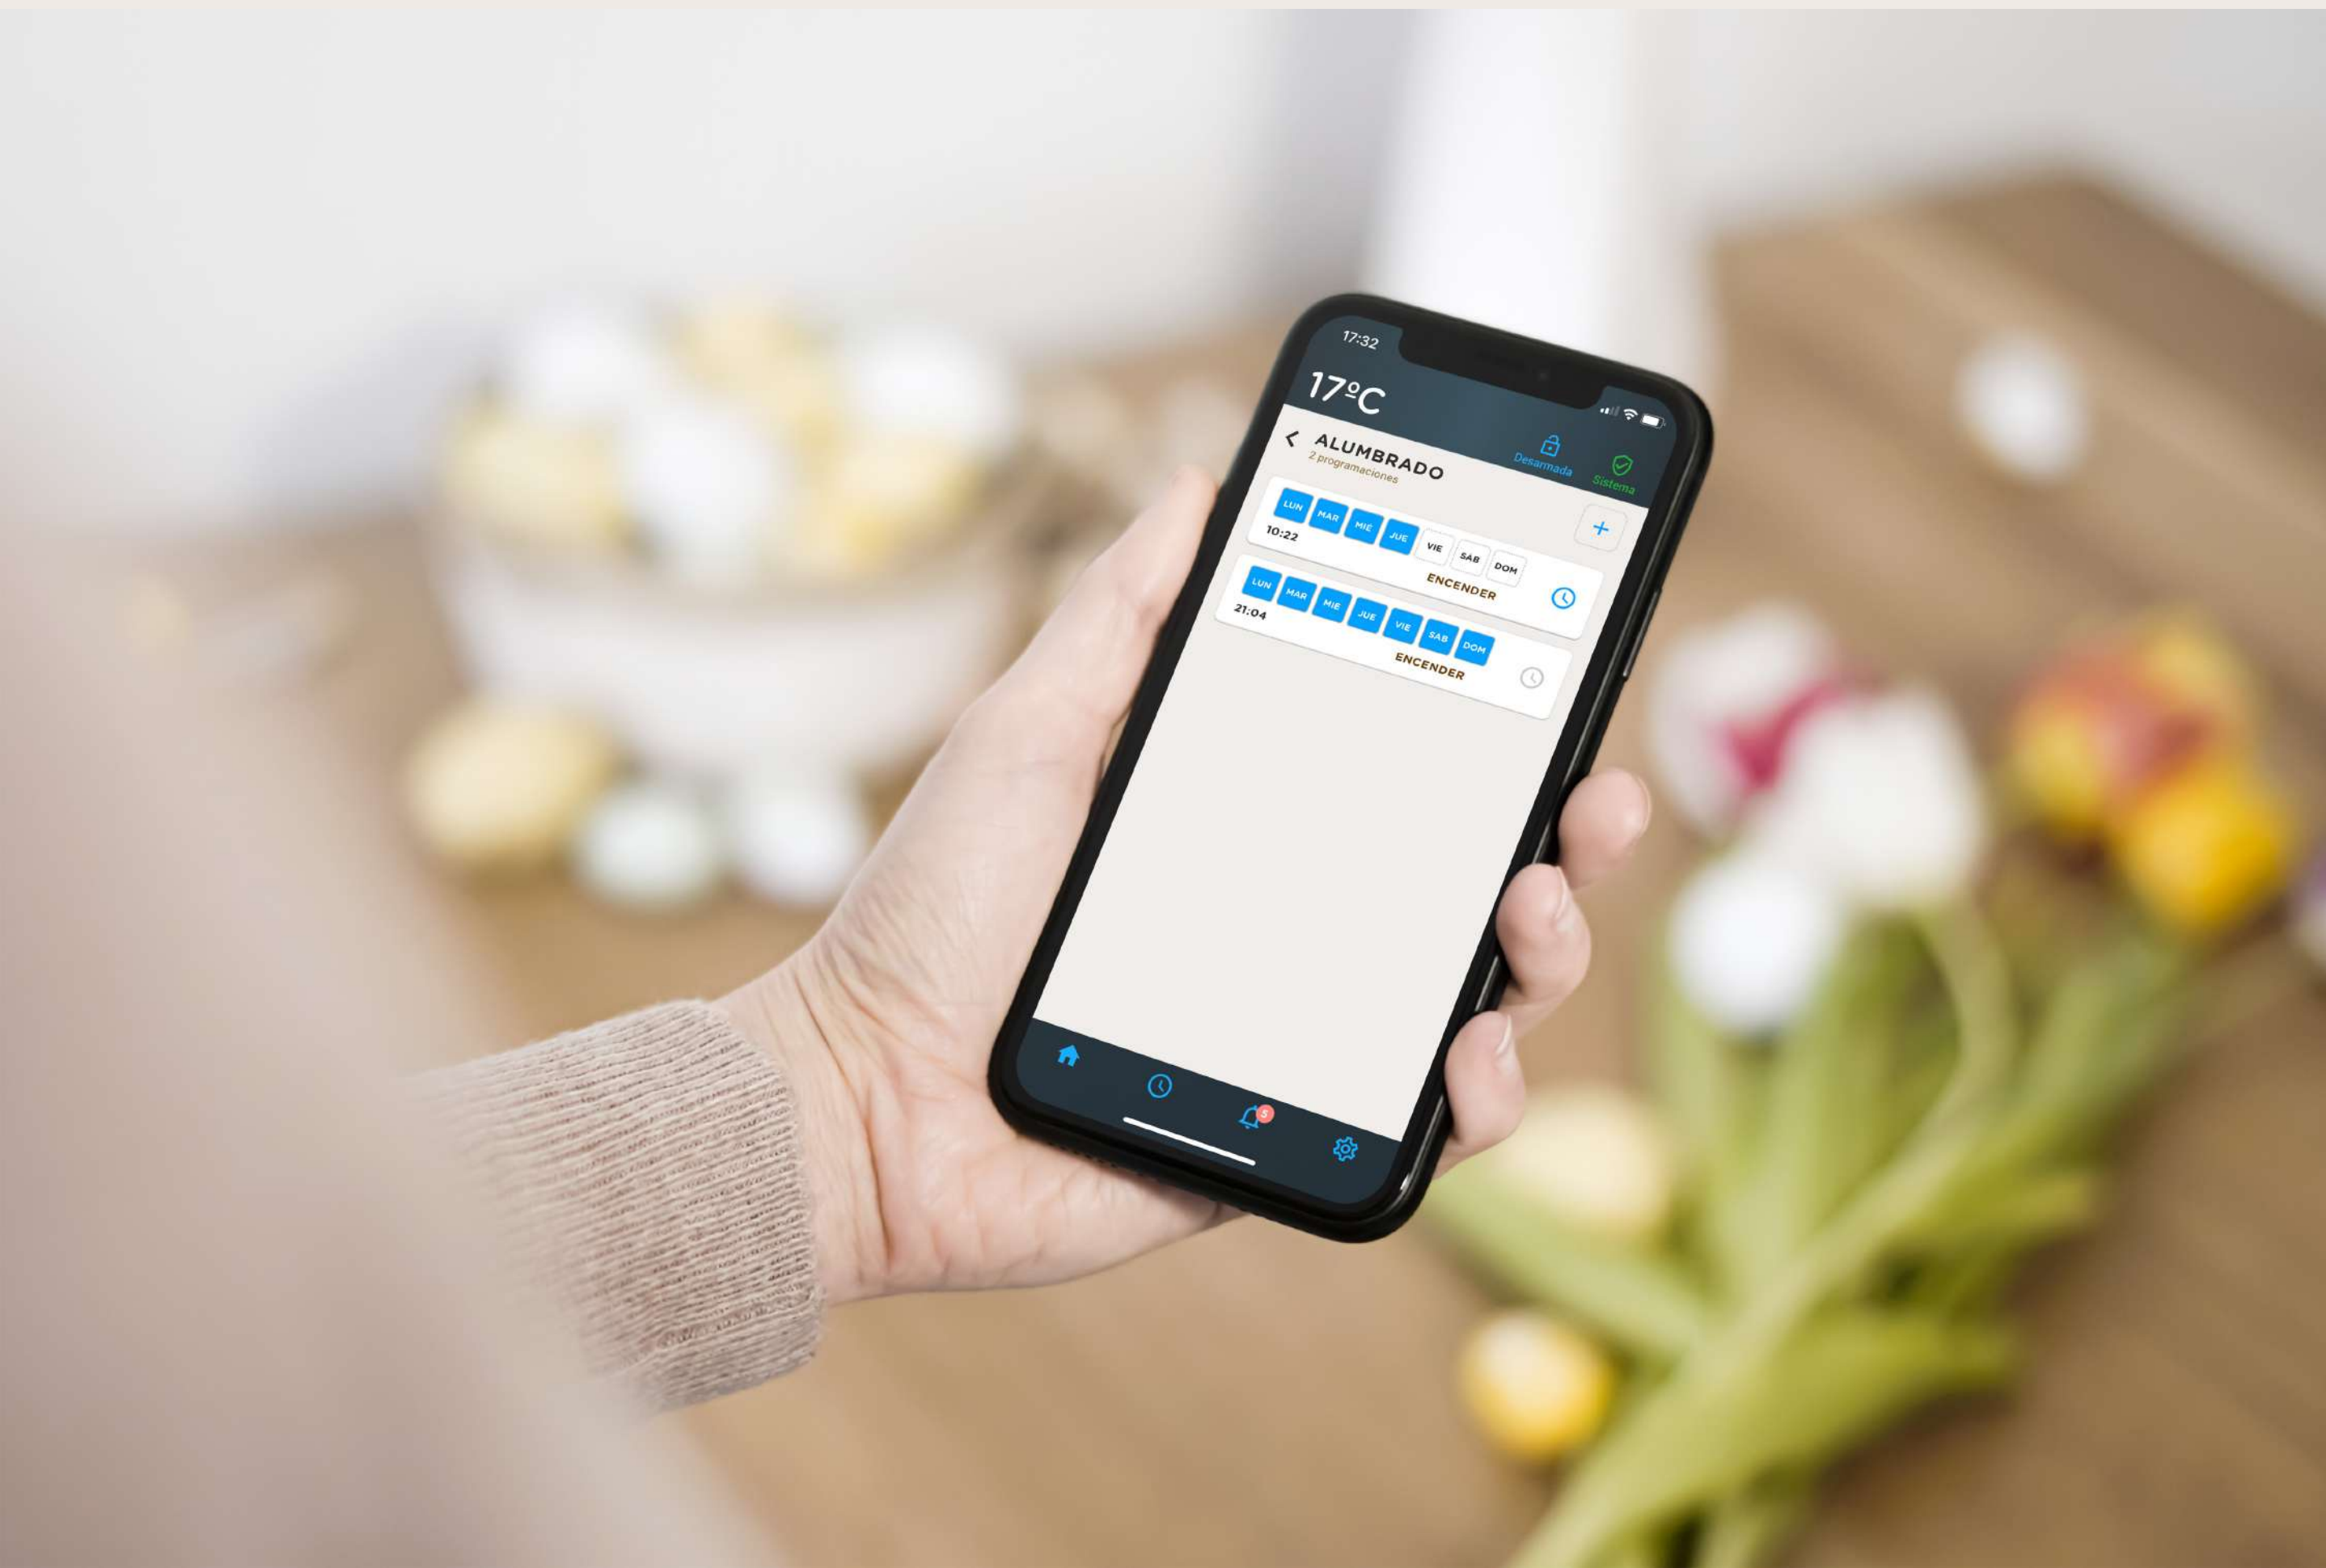

SCHEDULING & SCENES

Save time every day by automating actions based on time or events, such as turning on the heating in the morning, switching on the garden lights at dusk, or lowering the blinds at night for better sleep.

Forget about complicated programming. Create, edit, or delete scenes with just one click.

Setting up scenes is now much simpler for any type of user.

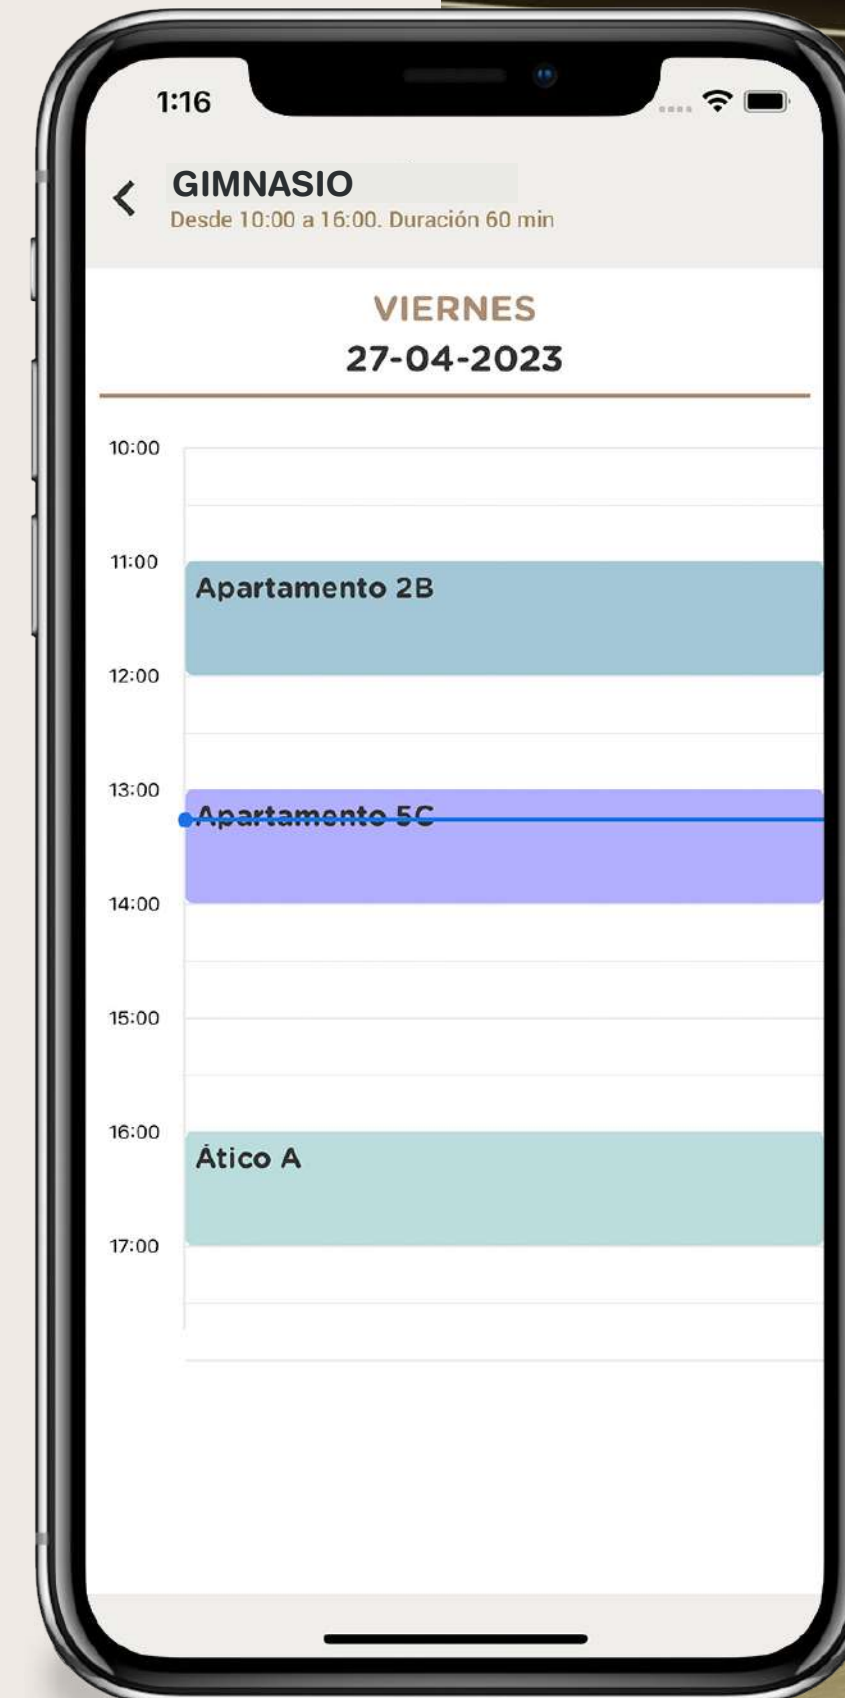

COMMON AREA BOOKING MANAGEMENT

Book shared spaces anytime, from anywhere. Simply open the ONNA app and make your reservation.

Avoid tedious phone calls to book the community's paddle court or gym.

You can also receive push notifications and reminders about your bookings.

Our app not only makes booking easy, but also manages capacity control and time limits, ensuring that spaces don't become overcrowded and that every user can enjoy the facilities in an organized and safe way.

As if you'd known it all your life...

All our panels come with the ONNA app, designed to be truly functional, easy to set up for any type of user, and visually appealing.

Thanks to its scroll down and sideways navigation, it offers a clean and well-organized interface, enhancing the user experience.

Linking the app is as simple as scanning a QR code.

Don't want wall-mounted panels?

ONNA S & ONNA SLITE

The ONNA S Cloud DIN-rail Server is the ideal solution for you.

It installs easily inside the electrical panel and includes all the functions of our panels, managed from anywhere using the ONNA app.

All the control, right from your smartphone.
